

History and politics of Uganda: Eventfull and on the rise

Uganda has a long and **eventful history**. Already populated in the ancient times, it didn't play an important role in the world due to its geographically isolated location. The **colonialists** and **missionaries** were followed by the **independence**. This however did not lead to democracy, but to the turmoil **dictatorships** of Amin and Obote. Not until the liberation through the still ruling President Museveni brought **stability** and closed up the gap to the world community.

Even though Uganda is still one of the poorest countries in the World today, it is in comparison to most of the other African countries on a steep and **stable way to the top!**
